Ramesh Ponnuru talked about his book The Party of Death: The Democrats, the Media, the Courts, and the Disregard for Human Life, published by Regnery Publishing. In his book, Mr. Ponnuru argues that abortion, embryonic stem cell research, and other procedures that end human life are immoral and should not be supported. He also looks at the political impact of the pro-life movement and says that public opinion on the issue of abortion has changed dramatically in their favor over the past few decades. Following his remarks Is the Democratic Party the “Party of Death?” If you look at their agenda they are. IT’S NOT JUST abortion-on-demand. Why Jesse Jackson, Al Gore, and other leading liberals gave up being pro-life. How liberals use animal rights to displace human rights. The Democratic presidential candidate who said that infanticide is a mother’s “choice.” How doctors and other health care professionals are being coerced, by law, into violating their consciences. The ultrasound revolution: why there’s hope to stop the party of death. Ponnuru’s shocking exposé shows just how extreme the Party of Death has become as they seek to destroy every inconvenient life, demand fealty to their radical agenda, and punish anyone who defies—the Party of Death: The Democrats, the Media, the Courts and the Disregard for Human Life— is a well-written assessment of a culture that has diminished respect for the sanctity of life. Ramesh Ponnuru, a journalist with the National Review, offers an erudite analysis of right to life and bioethics issues. The book is devoid of so many of the emotion-based arguments and instead takes a more cerebral look at abortion and how the intellectual basis supporting it ultimately leads to other ends such as euthanasia and infanticide. Ponnuru's book lays the case for opposing abortion. Ultimately, I think that presents a challenge to those on the pro-choice side.
