The following are some examples of citation styles for various sources. For complete information on citing sources in Chicago style, see the *The Chicago Manual of Style*, 16th Edition or *The Bedford Handbook*, 8th ed.

The Chicago style utilizes footnotes or endnotes for in-text citations and a bibliography page as a reference page. The bibliography is an alphabetical listing of the sources that appear in your notes. However, personal interviews and sources consulted but not included in the paper should not be included in the bibliography. Alphabetizing is based on the first letter of the author’s last name, or, if there is no author, the entry should be alphabetized by the first word of the title, excluding the articles “A,” “An,” or “The.” Each entry should begin at the left margin. If the entry goes on to two or more lines, the subsequent lines should be indented half an inch, creating a hanging indent. Each entry should be single-spaced, with an extra line of space between entries. Please see included page numbers for further clarification on each entry.
