By Robert Simmons. Introduction by Robert Sardello. Paperback / 7" x 10.875" / 320 Pages. In Stones of the New Consciousness, author Robert Simmons invites the reader to journey inward to the domain of the Stone Beings. Many of the minerals discussed in Stones and the New Consciousness are newly found materials not mentioned in The Book of Stones. All of them are met in new ways, through meditations narrated by the author, and through attunement to the stones' own voices. If you love crystals, gems and minerals and you want to find a new and deeper understanding of the potentials locked within them, and within yourself, Stones of the New Consciousness can open the door. 'Stones of the New Consciousness' was a welcome addition to my collection. Mr Simmons delves more deeply into some of the most powerful stones in existence, and his information on crystal grids was very insightful. I found this, along with 'The Book of Stones' to be far superior to Judy Hall's 'The Crystal Bible' collection - they're excellent for an overview, but those who are interested in learning more about the subtle energies of stones would do well to add these two books to your library. Robert Simmons makes all stones and crystals seem like they are powerful objects that can help everyone. However, I do not believe that every stone of each type of crystal are the same, the same way that while we are all humans and have 2 eyes, 2 ears, etc - we are all still individuals.
