
Fromm's final published statement constitutes a fitting testament to the diverse and distinguished career of one of the intellectual giants of the past four decades within the fields of sociology, psychoanalysis, and social criticism. Fromm uses his balanced evaluation of Freud's work to bring together and synthesize many of his own previously developed contributions. In his customarily simple, thoughtful, and incisive style, Fromm differentiates the lasting insights within Freud's thought from those aspects which are more delimited and socially relative. In route, he integrates his own important work on scientific methodology, character, dreams, the Oedipus complex, narcissism, and the seductions of contemporary consumer culture. Fromm's own vision will endure, while his voice will surely be missed. For most general and academic collections.—Stephen A. Mitchell, Social Sciences Div., Fordham Univ., Coll. at Lincoln Center, New York.

**Fromm's vision, Freud's lasting insights**

Eugenio Fromm will be remembered as one of the intellectual giants of the past four decades. Fromm uses his balanced evaluation of Freud's work to bring together and synthesize many of his own previously developed contributions. In his customarily simple, thoughtful, and incisive style, Fromm differentiates the lasting insights within Freud's thought from those aspects which are more delimited and socially relative. In route, he integrates his own important work on scientific methodology, character, dreams, the Oedipus complex, narcissism, and the seductions of contemporary consumer culture. Fromm's own vision will endure, while his voice will surely be missed. For most general and academic collections.—Stephen A. Mitchell, Social Sciences Div., Fordham Univ., Coll. at Lincoln Center, New York.
Erich Fromm’s most important contribution to the science of man and psychoanalysis was the development of an existential humanism. This existential bent was based on his view that the human condition developed over the course of human evolution transcending our biological needs for survival. His second important contribution was a brilliant Marx–Freud synthesis, which he used to explore how ideologies can mask economic conditions, and how shared social values that are internalized (social character) are adaptive to socioeconomic conditions.
