This book is also horribly lacking the ability to check how close your Office document that YOU made to their example. It's no use if you don't know how well you did. Things can look similar, but there are probably errors here and there. Go over all the programs in the XP Office suite. My only complaint is that the section on Outlook was a little thin. I am already getting ready to purchase the next text in the series and am looking forward to the things it will cover. See what's new with book lending at the Internet Archive. Microsoft Office XP: illustrated introductory. Item Preview. remove-circle. 1 volume (various pagings) : 28 cm. "Microsoft Office user specialist approved courseware." Includes index. Notes. water damage this book is spiral. Access-restricted-item. true. Microsoft Press books are available through booksellers and distributors worldwide.
